(a) live ibm_kingston, 4,000 shots
P(read 1)
rotation θ
ideal sin² (θ/2)
qubit 5: A*dev = 0.8148
qubit 42: A*dev = 0.8128
(b) entanglement as side information
classical 0.75
cos² π/8
statevector simulation
Sherbrooke noise model
Brisbane noise model
Kyiv noise model
Torino noise model
Fez noise model
Marrakesh noise model
Quebec noise model
Kawasaki noise model
live ibm_kingston
Delft Bell test (300 trials)
CHSH win rate
(c) side information
simulation
Delft data
accuracy predicting an outcome
none
classical
quantum
own setting
